

3.8	Material Handling .....	106
3.9	Quality Control .....	113
3.10	Production Tests .....	114
3.11	Plant Audits .....	117
3.12	Chapter 3 References .....	118
<b>Chapter 4:</b>	<b>Predicting Long-term Behavior .....</b>	<b>121</b>
4.1	Aging .....	121
4.2	MV Cable Aging Tests .....	123
4.3	Field Experience - MV Cables .....	135
4.4	Analysis of Utility Failure Data .....	141
4.5	HV and Extra-high Voltage (EHV) Cable Aging Tests .....	143
4.6	HV & EHV Cable Design Procedures .....	147
4.7	Diagnostic Testing in the Field .....	162
4.8	Chapter 4 References .....	164
<b>Chapter 5:</b>	<b>Global Experience .....</b>	<b>169</b>
5.1	MV Cables .....	171
5.2	HV and EHV Cables .....	185
5.3	Chapter 5 References .....	197
<b>Chapter 6:</b>	<b>Future Trends .....</b>	<b>199</b>
6.1	Improved Productivity .....	200
6.2	Improving Cable Performance with Respect to Aging .....	200
6.3	Recycle/Recover Cable Designs .....	202
6.4	The Increased and Widespread Use of Efficient DC Power Transmission .....	202
6.5	Integrated Data and Energy Delivery .....	204
6.6	Diagnostics and Smart Cables .....	204
6.7	High Temperature Superconductivity (HTS) .....	205
6.8	Gas Insulated Lines (GIL) .....	208
6.9	Chapter 6 References .....	209
